Introduction
My name is Daniel Eden, and I'm a designer with a penchant for the web, interaction design, and typography. I like scratching my own itch and writing about design, courage, and lack thereof.

In 2013, I graduated from Nottingham Trent University with a 1st class degree in Digital Media Technology BSc. After graduating, I joined Dropbox in San Francisco as their first Design intern, and later became a full-time Designer and Engineer on the Revenue and Web Platform teams.

I'm currently working as a Product Designer for Facebook in California.

Education
Digital Media Technology BSc
Nottingham Trent University
September 2009–June 2013

Skills
Design with a focus on web, interaction, and typography; front-end development with a focus on SCSS and CSS architecture; Git SCM; JavaScript (including CoffeeScript and React.js); some experience in Swift, Ruby, and PHP.

Projects and Employment
Currently: *Product Designer at Facebook (2016–present)*

Scooter (Dropbox, 2015–2016)
Scooter is an SCSS framework for Dropbox web engineers and designers, designed to reduce new CSS and increase design consistency on the web.

Help Center (Dropbox, 2014–2015)
Redesigned the Dropbox Help Center to more closely match our brand and to help users find the support they need more easily.

User Avatars (Dropbox, 2014–2015)
Helped create and implement a design system and web framework for displaying and interacting with different types of user avatars on Dropbox web.

Dropbox Pro (Dropbox, 2014)
Led design and supported front-end engineering for the Dropbox Pro pages, purchasing experience, and account management.

Onword (onword.co)
A minimal and distraction-free writing environment for the web.

Brills (brills.me)
A simple and easy to use money management web application.

Animate.css (daneden.me/animate)
A popular CSS animation library used by prolific websites and organisations such as EA Games, Foursquare, and Disney.
